ARTIFICIAL INTELLIGENCE DISCLOSURE · ART. 50 REGULATION (EU) 2024/1689

This report was produced with the assistance of an artificial intelligence system. It contains objective findings from public sources and is not legal advice or an opinion on registrability.

What this report is, and what it is not

This report gathers what is published today about the names you gave us: domains, trade marks registered in some seventy offices, handles, search engines and how the name reads in five languages. Every data point carries its source and the time it was checked, and at the end you will find the full dump of the queries so that you or your lawyer can repeat them.

What this report does not do

- **It is not an opinion on registrability.** We do not say whether a name can be registered: that is for a trade mark attorney or a lawyer, and they sign it.
- **It does not assess the likelihood of confusion.** We point out similar marks and the classes they sit in; weighing whether there is confusion is a professional judgement.
- **It does not replace the official pre-filing search** or the office's examination.
- **It does not state whether a registration is live or lapsed** when the source does not publish that. Where we do not know, it says “no data”.

How to read the flags

● NO FINDINGS	We found nothing in that check. It does not mean nothing exists: it means nothing is in the sources consulted.
● NEEDS JUDGEMENT	There is something someone has to weigh: a similar mark outside your classes, a taken domain, an awkward reading in one language.
● LIKELY OBSTACLE	There is a mark in your classes with effect in your territory, or the name has no domain available anywhere. It usually means changing the name or getting a legal opinion before you invest.
○ NO DATA	The source did not answer or does not cover that case. We do not fill it in with guesses.

Your order as we received it

NAMES AUDITED

9, 35, 42, 45

Summary of findings

One row per name. This table counts flags; it does not choose for you.

● NO FINDINGS ● NEEDS JUDGEMENT ● LIKELY OBSTACLE ○ NO DATA

NAME	DOMAINS	MARKS	NEIGHBOURHOOD	HANDLES	SEARCH	READING	WORST FLAG
Markfindings	●	●	●	●	●	●	● NEEDS JUDGEMENT
Namefindings	●	●	●	●	●	●	● LIKELY OBSTACLE
Deslindada	●	●	●	●	●	●	● NEEDS JUDGEMENT

One line per name

Markfindings	4 extensions available with an authoritative answer and 8 with no DNS record, out of 12; 0 marks with the exact wording; 2 with the root “markfind”, of which 2 sit in your classes; 2 findings in your classes in total; no neighbouring words; 3 syllables.
Namefindings	4 extensions available with an authoritative answer and 8 with no DNS record, out of 12; 0 marks with the exact wording; 9 with the root “namefind”, of which 8 sit in your classes; 8 findings in your classes in total; no neighbouring words; 4 syllables.
Deslindada	4 extensions available with an authoritative answer and 8 with no DNS record, out of 12; 0 marks with the exact wording; 5 with the root “deslind”, of which 1 sit in your classes; 1 finding in your classes in total; no neighbouring words; 4 syllables.

What these numbers do not say

A green dot does not mean the name is free: it means we found nothing in the sources consulted, which are public and not exhaustive. A red dot does not mean you cannot use the name: it means there is an earlier mark in your classes and that a professional should weigh the risk before you invest. And no dot judges whether your name is good: that is not a check, it is your decision.

Nice classes applied to your activity

This is classification, not advice: it is how the activity you declared is classified. Every trade mark search in this report has been filtered by these classes.

CLASS	WHAT IT COVERS	WHY IT APPLIES
9	Scientific apparatus and instruments; downloadable software; computer applications	your activity says “software”
35	Advertising; business management, organisation and administration; office functions; brand consultancy and market research	your activity says “brand”
42	Scientific and technological services; software design and development; software as a service; industrial and graphic design	your activity says “software”
45	Legal services; security services; personal and social services	your activity says “legal”

MARKFINDINGS · REGISTERED TRADE MARKS

What is registered

Three searches, from strictest to broadest. Those falling in your classes (9, 35, 42, 45) are flagged. The source of each query is on the evidence page.

SEARCH	TERM	RESULTS	IN YOUR CLASSES	FLAG
exact search	markfindings	0	0	● NO FINDINGS
“contains” search	markfindings	0	0	● NO FINDINGS
root search	markfind	2	2	● NEEDS JUDGEMENT

Marks found

MARK	OFFICE	FILE NO.	FILED	CLASSES	OWNER	IN YOUR CLASSES
TRADEMARKFINDER	USPTO (United States)	76172388	22/11/2000	42	BRAIN WAREHOUSE, LLC	● YES
TRADEMARKFINDER	USPTO (United States)	76172309	22/11/2000	35	Schneider, David L.	● YES

Whether each registration is live, lapsed or renewed is not asserted: the source consulted does not publish it. Checking that is the law firm's work and part of the opinion at the level with legal review.

Why this is flagged

There are 2 marks in your classes. The one that weighs most is TRADEMARKFINDER, owned by BRAIN WAREHOUSE, LLC, at USPTO (United States), filed on 22/11/2000. Of your classes it covers 42. That office is outside the territories you indicated.

“Weights most” means the office with effect in your territories and, among those, the oldest. It is not a judgement on risk: risk is assessed in the legal opinion.

Phonetic neighbourhood

Beyond the three searches above we queried 14 systematic variants of the name — vowel swapped, voiced for voiceless consonant, syllable added or dropped — one by one: this is where the marks a literal search misses show up. **None returned marks in your classes.** The variants queried were: marcfindings · markfandings · markfendings · markfindangs · markfindengs · markfinding · markfindingc · markfindingsa · markfindingso · markfindingz · markfindinjs · markfindongs · markfindungs · markfintings. Each appears with its timestamp on the evidence page.

What people associate and how it reads

Autocomplete by country

What Google suggests when you type the name in each country: it shows whether an entity has already taken the word, or whether there are only dictionary queries.

COUNTRY AND LANGUAGE	SUGGESTIONS
es-ES · Spanish (Spain)	● NO SUGGESTIONS: NOBODY HAS TAKEN THE EXPRESSION
pt-PT · Portuguese (Portugal)	● NO SUGGESTIONS: NOBODY HAS TAKEN THE EXPRESSION

NAMEFINDER	USPTO (United States)	—	12/06/2002	9	Applications Technology	● YES

Whether each registration is live, lapsed or renewed is not asserted: the source consulted does not publish it. Checking that is the law firm's work and part of the opinion at the level with legal review.

Why this is flagged

There are 8 marks in your classes. The one that weighs most is BRANDNAMEFINDER, owned by Innomark Gesellschaft für Markenentwicklung, at EUIPO (European Union), filed on 30/10/2003. Of your classes it covers 9, 35, 42. That office has effect in the European Union, which is among your territories.

“Weighs most” means the office with effect in your territories and, among those, the oldest. It is not a judgement on risk: risk is assessed in the legal opinion.

Phonetic neighbourhood

Beyond the three searches above we queried 14 systematic variants of the name — vowel swapped, voiced for voiceless consonant, syllable added or dropped — one by one: this is where the marks a literal search misses show up. **None returned marks in your classes.** The variants queried were: namafindings · namefandings · namefendings · namefindangs · namefindengs · namefinding · namefindingc · namefindingsa · namefindingso · namefindingz · namefindinjs · namefindongs · namefindungs · namefintings. Each appears with its timestamp on the evidence page.

Syllables	3	4	4
Worst flag	● NEEDS JUDGEMENT	● LIKELY OBSTACLE	● NEEDS JUDGEMENT

WHAT TO DO NOW

The steps, in order

1. **Register the domains of the names still standing while you decide.** It costs about ten euros a year per extension and it avoids the most expensive situation of all: falling for a name and finding it registered two weeks later. Start with the .com and with the country where you sell.
2. **Do not commission visual identity yet** if any name carries a red or amber flag on marks. Redoing an identity costs far more than a legal opinion.
3. **If you are going to register the mark, order the opinion.** This report tells you what is out there; the opinion tells you whether you can register it, a law firm signs it, and it arrives as a separate document under their own seal. That is the level with legal review.
4. **Check by hand the handles shown here as “no data”:** Instagram, X, LinkedIn, TikTok and GitHub cannot be verified reliably without a session.
5. **Expect this report to expire.** The registers change every week. The queries in this report are from 12 Sep 2026 20:07 UTC.

Domains you can register today

These show as available or unregistered in this report's checks. They cost between ten and fifteen euros a year each, and they are the only thing on this list you can lose while you decide.

NAME	EXTENSIONS AVAILABLE	CHECKED BY
Markfindings	markfindings.com · markfindings.net · markfindings.org · markfindings.fr	RDAP

What the legal opinion covers, if you order it

A search for identical and similar earlier rights at the Spanish and EU offices and in international registers with effect in the territories you indicate; an analysis of the likelihood of confusion and its severity; an assessment of the absolute grounds, in particular distinctiveness and descriptiveness; and an express conclusion on registrability. The law firm signs it, not us, and it is delivered as an independent document.

ANNEX

Method, sources and the limits of each source

WHAT IS CHECKED	SOURCE	QUERIES	ANSWERED
Nice classes	current Nice Classification	1	1
linguistic reading	own reading rules and control list	3	3
domains	DNS resolution; RDAP	36	36
search and autocomplete	Google autocomplete de-DE; Google autocomplete en-GB; Google autocomplete es-ES; Google autocomplete fr-FR; Google autocomplete pt-PT	15	15
social handles	GitHub; Instagram; LinkedIn; TikTok; X; YouTube	18	18
trade marks	TMview (EUIPO, OEPM, USPTO, WIPO and ~70 offices), query captured via browser 2026-09-12	51	51
Total		124	124

Known limits, said before you discover them

SOURCE	WHAT IT DOES NOT COVER
Trade mark databases	They do not guarantee exhaustiveness; they do not publish live or lapsed status by this route; very recent applications may not be loaded; figurative marks without text cannot be found by wording.
Domain RDAP	Covers .com, .net, .org and .fr. An “available” domain may be reserved by the registrar or in a grace period.
DNS resolution	For .es, .de, .eu, .it, .pt, .io, .co and .app: the absence of DNS suggests it is probably unregistered, but a registered and unconfigured domain does not resolve either.
Autocomplete	Depends on each country’s search history and changes over time; it measures attention, not rights.
Social handles	Only those returning a reliable status without a session are asserted.
Linguistic reading	Documented reading rules and a closed list of undesirable words; it is not a study with native speakers.

Glossary

NICE CLASS

Every mark is registered for specific goods or services, grouped into 45 classes. Two identical marks can coexist in different classes.

WORD AND FIGURATIVE MARKS

A word mark protects the words; a figurative mark protects words and graphics together, and protects the words alone less.

OPPOSITION

Whoever holds an earlier mark may oppose yours within a period after publication. In the EU the office does not do this of its own motion.

LIKELIHOOD OF CONFUSION

That the public might believe two marks come from the same undertaking. It is assessed on the similarity of the signs and of the services at once.

EVIDENCE · 1 OF 8

Every query, with its timestamp

This is what makes the report verifiable: what we asked, of which source, when, and what it answered. You can repeat any of these queries, or hand them to your lawyer. 124 queries in total.

TERMS

Scope, liability and data

Scope

This report contains objective findings from public sources about the names given in the order, in the classes and territories indicated, as at the date and time recorded for each query. It contains no legal advice, no opinion on registrability and no assessment of the likelihood of confusion.

Expiry of the data

Trade mark and domain registers change continuously. A finding that is correct today may not be next week, and an absence of findings never guarantees that a name is free. That is why the report is dated.

Limit of liability

Liability for this report is limited to the amount paid for it. We are not liable for decisions to invest in identity, domains, registrations or communication taken on the basis of it, nor for the outcome of a registration or opposition procedure.

Artificial intelligence

This report was produced with the assistance of an artificial intelligence system. It contains objective findings from public sources and is not legal advice or an opinion on registrability.

Personal data

We process the minimum data needed to issue and deliver the report. If you order the level with legal review, we pass the law firm only what it needs to address the opinion to you. We share data with no one else and use it for no other purpose.
